

Ruslan Kolodinov

AI Motion Designer — Creative Automation

Kharkiv, Ukraine · Remote / [ruslan2413.github.io](#) / kruslan2413@gmail.com / [t.me/ruslan_kolodinov](#) / [LinkedIn](#)

Performance motion designer working where motion design, generative AI video and automation meet. 4,000+ ad creatives shipped for Meta, Google and TikTok. I build the tools my team uses every day — from an After Effects subtitle plugin to an AI agent that turns a brief into a production-ready AI film.

EXPERIENCE	Growity · Zenfy EdTech · Remote	Aug 2026 – Present
	<i>Motion Designer & Creative Automation</i>	
	– Own end-to-end production of 1–3 minute AI-generated video ads on Seedance 2.5: character design, shot prompting, generation, edit and sound. – Beyond AI video: illustrated and hand-drawn animation, app UI motion and 3D characters. – Deliver performance video for Meta, Google and mobile ad networks across four aspect ratios, with platform safe zones and EN / ES localisation. – Led an internal workshop that taught the creative team to build their own AI skills.	
	Agen SKELAR ecosystem	Mar 2025 – Jul 2026
	<i>Performance Motion Designer</i>	
	– Produced 4,000+ ad creatives for Meta, Google and TikTok — AI UGC, story-driven video, motion graphics and statics. – Designed a “Character DNA” system that keeps one AI character consistent across scenes and models (Veo, Kling, NanoBanana) for a US 45+ dating app. – Built the team’s After Effects toolkit: SubForge (Whisper auto-subtitles with style presets, used daily), Word Highlighter (karaoke-style word sync) and UGC Footages (batch vertical comps from raw footage). – Partnered with marketers on ideation and creative testing, iterating against CTR, CPA and ROI.	
	Freelance	Sep 2022 – Mar 2025
	<i>Graphic Designer</i>	
	– Designed social, advertising and brand visuals for clients across industries.	

SELECTED PROJECTS	SceneForge. After Effects panel that generates AI video from dozens of models straight onto the timeline, with multi-scene continuity, cost estimates and auto-updates.	
	Creative Hub. Desktop app (Tauri · macOS, Windows) that brings the team’s AI services into one window, with separate account profiles and a shared character library.	
	AI Movie Writer. Agent that turns a brief into a timed screenplay and per-shot generation prompts, packed to the model’s 30-second limit so each ad needs fewer generations. Used daily by the team.	
	Static-to-Motion. Agent that animates a static ad into finished video for every placement.	

SKILLS	Motion & design	After Effects (expressions, ExtendScript), Premiere Pro, Photoshop, Illustrator, Figma
	Generative AI	Seedance, Higgsfield, Kling, Veo, HeyGen, ElevenLabs, NanoBanana, GPT Image, Midjourney
	Automation	Claude Code, ChatGPT, Whisper, ffmpeg, Adobe CEP, Cloudflare Workers
	Languages	Ukrainian (native), English (B1)

EDUCATION	Kharkiv National University of Economics	2024 – Present
	<i>BSc, Information Technology</i>
